connect engage evolve

bibliotheca is committed to transforming libraries by creating solutions that help them connect, engage and evolve. For more than 45 years, bibliotheca has dedicated research and development efforts to producing technologies that allow libraries to focus on the important needs of their communities – literacy efforts, job search programs, community outreach. Our goal is to empower libraries to reinvent their offerings and to encourage lifelong learning today and well into the future.

self-service | selfCheck™

Self-service is only convenient if it's easy. Our intuitive selfCheck solutions and software were developed to meet the specific needs of library users. quickConnect software allows users to find out about library events and happenings via a digital billboard, apply for a library card, and pay for fees – all at self-checkout. It integrates seamlessly with cloudLibrary™, our digital collection platform, enabling patrons to discover and borrow digital materials right from the kiosk. This empowers libraries to showcase their physical and digital collections in one place.

open libraries concept open+™

open+ is a comprehensive system that increases community engagement and improves service by providing access to the library during nonstandard hours. open+ allows you to attract new users who are unable to visit the library during traditional hours while increasing the use of your community space and allowing for staffing flexibility.

RFID security detection

EM security detection

security detection systems

Keep your assets safe with bibliotheca's range of security gates. We offer a variety of options including wide-aisle gates designed to accommodate parents with strollers, disabled patrons, and large groups. We support both RFID and electromagnetic (EM) technologies with visually appealing designs to fit your library aesthetics while protecting your valuable materials.

return + sorting | flex AMH™

With any combination imaginable, flex AMH is the maximum time saver, delivering efficient workflows that keep your circulation moving even during peak times so your staff can focus on more meaningful tasks. Completely modular and flexible, this Lego-like system allows for the accurate sorting of library materials and can easily be customized for your space and user requirements. A host of available options, including the flex bulkSeparator for drop-and-go returns and adjustable height bins for staff comfort, ensure you can design the perfect fit for your needs. Available with barcode, EM and RFID technologies, the flex AMH can improve efficiencies and service within any library!

go beyond your library walls remoteLocker™

remoteLocker has been designed to extend the coverage and accessibility of your library service, offering users a self-service holds pick-up experience at locations and times more convenient to them. Eye-catching graphic wraps help expand your library brand within the community and each system is customizable for your library or community space.

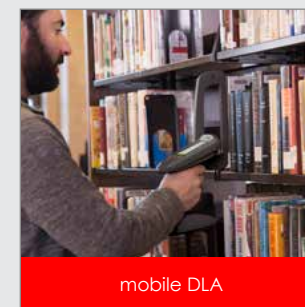

eBooks + eAudiobooks | cloudLibrary™

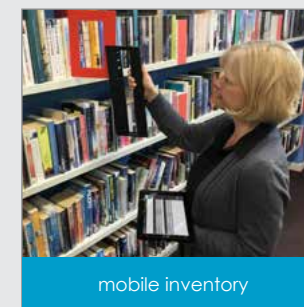

cloudLibrary is an easy-to-use eBook and eAudiobook solution that allows libraries to do much more than circulate digital content! Offering one-click borrow and download, cloudLibrary simplifies digital lending while offering a host of other features to integrate your physical and digital collections. Drive digital users to your library with event integration. Securely and easily recruit new library users with in-app sign-up. Offer virtual library cards for smartphone users, and more! In the library, cloudLibrary pairs perfectly with quickConnect to promote digital content at checkout.

RFID + EM (hybrid) staff tools

staff tools + collection management

Staff time is precious. Our staff solutions focus on quick and easy tagging solutions, fast processing of items and helpful collection management tools. Our solutions take staff workflow into consideration, providing tools that keep your team happy while maximizing efficiency. From shelf-reading, re-shelving, searching and weeding to exception-finding, our solutions take the manual work out of large collection searches and ease the daunting task of actively managing your collection.

central administration libraryConnect™ devices

libraryConnect is a central platform that allows libraries to access and configure bibliotheca equipment across multiple library branches from any internet-connected computer or tablet. Efficiently configure multiple devices across many locations, pull aggregated monthly reports and analyze the usage of your library to make better data-informed decisions.

supplies for continuous operation

With all of our solutions, we offer a range of supplies needed to maintain your library investment in self-service. From RFID tags, Tattle-Tape™ Security Strips and receipt rolls to media locking cases, we offer customers the very best selection of options. Our tags, strips and cases are guaranteed to work hand-in-hand with your bibliotheca equipment for seamless operation.

service + support

You have invested in your library and community; allow us to offer service you can count on. Service begins with the development of quality products that will provide maximum long-term value. With our industry-leading service plans, you get expert maintenance and repair along with personalized support to minimize any inconvenience for your patrons. Additionally, we provide all customers with free access to libraryConnect. There you can find video self-help, tutorials and guides to equipment, which empower library staff to solve routine issues quickly and eliminate downtime.
