library solutions that connect, engage and evolve
Transforming libraries

bibliotheca is committed to transforming libraries by creating solutions that help them connect, engage and evolve. For nearly 50 years, bibliotheca has dedicated research and development efforts to producing solutions that allow libraries to focus on the evolving needs of their communities – literacy efforts, job search programs, community outreach and more. Our goal is to empower libraries to reinvent their offerings and to encourage lifelong learning today and well into the future.

we help your library

connect
Provide a connection between the library and its users, wherever they happen to be, expanding its reach and role within the community.

engage
Encourage interaction with the library, in unique ways, that drives participation and enhances its overall importance.

evolve
Empower libraries to reinvent their offering and encourage lifelong learning today and well into the future.

Whether your library uses RFID, EM, barcodes or a hybrid mix of library technologies, we have you covered

The power of RFID
RFID provides library staff with powerful operational benefits. With the ability to store data, such as the item ID and security status on the tag, libraries can improve their productivity with the use of itemized reports and materials tracking. Faster self-service transaction times with multiple-item processing allow users to quickly get on with their day.

Genuine Tattle-Tape™
Libraries trust the reliability of Tattle-Tape™ solutions to keep their collections secure and available for users to access. EM is a reliable technology that helps protect your materials from inadvertent removal and theft. Our entire range of Tattle-Tape™ solutions is designed for easy use and reliable performance.
Self-service is only convenient if it’s easy

Our intuitive solutions were developed to meet the specific needs of library users. Not only can users easily borrow, return and renew physical items at our selfCheck™ kiosks, but they can also discover library events and programs, get new reading recommendations and even pay their library fees. Users can also borrow items from their smartphones, receive interactive selfCheck receipts on the go, easily switch between multiple virtual library cards in-app, and discover digital materials both at the physical selfCheck and on the go. When libraries truly integrate their physical and digital experiences, they empower readers.

Included with every selfCheck running quickConnect, cloudLibrary assist provides interactive receipts, library visit prep lists and helpful reminders for library transactions.

cloudLibrary checkout complements our selfCheck range with a mobile checkout experience that allows users to quickly borrow physical items from their own device.

cloudLibrary content offers an intuitive digital reading experience, making it easy for users to access and navigate digital eBooks and eAudiobooks.

Creating a more engaging experience for your library users, cloudLibrary™ helps physical borrowers stay organized with a convenient virtual library card, interactive receipts, due date reminders, organized packing lists and the ability to sort/filter and favorite items. Boasting a clean and modern UI, this app helps library users manage their borrowing history with ease and clarity. With three distinct modules that libraries can mix-and-match, cloudLibrary delivers a great app experience for library users.

One app that empowers readers
Extend open hours and provide convenient access

open+™ is a comprehensive solution that allows libraries to increase their open hours and build community engagement with extended access to self-service resources, wireless connections, physical collections and inviting spaces. Not only can libraries attract new users who are unable to visit the library during traditional hours but they can also be more flexible with their staff hours and focus on literacy needs of the community beyond the four walls of the library.

Read more... on our open+ webpage

Attract new users with expanded open hours

Older patrons wanting quiet time in the morning to read newspapers
Students seeking a quiet space for studying in the evening
Shift workers and commuters that can’t make traditional open hours
Parents with young children looking for welcoming and enjoyable space

Deliver library holds to new locations

remoteLocker™ has been designed to extend the coverage and accessibility of your library service, offering users a self-service holds pick-up experience at locations and times more convenient to them. The modular system is customizable for any library or community space, while eye-catching graphic wraps help expand your library brand wherever the remoteLocker is located. Could your next library location be inside a grocery store, YMCA, community center or fire station?

Get books back on shelves faster and maximize staff productivity

Without automated return and sorting, getting returned books back on the shelf for the next borrower could take days. Streamline the library return process and maximize efficiency with flex AMH™. Accomplish work that used to require days in mere hours and reap the rewards of happier readers as well as library staff. For large library systems that span across multiple floors and buildings, flex transportation systems allow for library materials to make it back to the correct location with ease. Completely customizable for your space and user requirements, flex AMH allows for the accurate sorting of library materials, improving efficiencies and service within any library!

Protect valuable materials in style

Keep your investment in physical collections safe with bibliotheca’s range of security gates. We offer a variety of options including wide-aisle gates designed to accommodate parents with strollers, disabled patrons, and large groups. We support both RFID and electromagnetic (EM) technologies with visually appealing designs to fit your library aesthetic while protecting your valuable materials.

Staff tools + collection management

Staff time is precious. Our staff solutions focus on quick and easy tagging solutions, fast processing of items and helpful collection management tools. Our solutions take staff workflow into consideration, providing tools that keep your team happy while maximizing efficiency. From shelf-reading, re-shelving, and searching to weeding and exception-finding, our solutions take the manual work out of large collection searches and ease the daunting task of actively managing your collection.

Get the most out of your bibliotheca solutions with libraryConnect™

libraryConnect is a free one-stop dashboard where bibliotheca customers can access self-help training materials, download detailed product guides and view customer support updates.

View and download a wealth of self-help training materials, including videos and user guides.

Gain greater product insight through detailed documentation across our entire solution range.

Create, view and update support cases, view current status of service contracts and update library contacts with ease.

Configure equipment and run reports from one central location

libraryConnect devices* is a central platform that allows libraries to access and configure bibliotheca equipment across multiple library branches from any internet-connected computer or tablet. Efficiently configure multiple devices across many locations, pull aggregated monthly reports and analyze the usage of your library to make better data-informed decisions.

* An annual subscription is required to access libraryConnect devices.
Easy reordering of library supplies

We offer a range of supplies needed to maintain your library investment in self-service. From RFID tags and Tattle-Tape™ Security Strips to receipt rolls and media locking cases, we offer customers the very best selection of options and make it easy to replenish supplies. Our tags, strips, and cases are guaranteed to work hand-in-hand with your bibliotheca equipment for seamless operation.
