

bibliotheca mobile™ DLA

actively manage your library collection

As a component of the RFID System, this cordless, handheld device instantly reads RFID tags on library materials simultaneously, turning shelf-reading, shelving, sorting, searching, weeding and exception-finding into routine tasks. Compact and easy to use, the mobile DLA can hold information on more than one million items. The ergonomic design and swivel antenna maximise comfort and reduce the need to bend or stretch to read high or low shelves.

With the ability to simultaneously perform shelf-reading, searching and inventory scans, mobile DLA can save time, increase productivity and discover errors that might otherwise go unnoticed. The device can also quickly identify items that were not properly checked out and instantly detect the security status of materials. Start actively managing your library collection today with the state-of-the-art mobile DLA.

benefits of mobile DLA

Easy To Use

- | Ideal for shelf-reading, re-shelving, searching, weeding and exception-finding
- | Simultaneously performs shelf-reading, searching and inventory scans
- | Increases productivity and creates a more orderly library

Enhanced Security

- | Instantly detects materials that cause an alarm
- | Identifies items not properly checked out or in
- | Allows you to change security status of an item
