bibliotheca selfCheck™ 410

Non-RFID interactive kiosk

The selfCheck™ 410 is a great complementary kiosk to have alongside our standard RFID and Hybrid (EM/RFID) self-service kiosk range.

Allowing library patrons to utilise additional functions outside of borrowing and returning items, your library has the flexibility to cater to any type of situation.

selfCheck™ 410 allows libraries to use functions such as PC reservation and print management, mycommunity™ extended payment services, media disc dispensing, and quick and easy intelligent returns.

allow for PC reservations and print management

With the appropriate software, your patrons can use the selfCheck™ 410 as a stand alone PC booking and print management hub. When attached to a payment station, this combination allows your patrons the freedom to pay for print jobs without having to see a member of staff as well as the flexibility to reserve a PC quickly and easily. Used alongside traditional kiosks in your library, you can keep the flow of your library moving, adding to the overall customer experience for the patron.

complete the smartShelf™ instantaneous return solution

When paired with the smartShelf™ return solution, the selfCheck™ 410 displays and confirms the RFID tagged library materials that are placed on the shelf and shows them to patrons on the 19" monitor. Patrons are quickly reassured that their items are successfully checked in and removed from their account without any need for interacting with the kiosk.
